DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16 and 25-27, drawn to a method for inducing contraception.
- II. Claims 17-19, drawn to a method of providing hormone replacement therapy.
- III. Claims 20-22, drawn to a method for treating carcinomas.
- IV. Claims 23 and 24, drawn to a method of treating dysfunctional bleeding, uterine leiomyomata, endometriosis or polycystic ovary syndrome.

Whichever of Groups I-IV is elected, the Examiner will examine the pharmaceutical kit of claim 28 therewith regardless of the intended use recited in the preamble of claim 28.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions and different end-effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1614

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
